OFFICE OF THE DEWAN OF MYSORE,
(REVENUE AND GENERAL DEPARTMENTS).

(Full Office Note.)

A Subject. Letter no. 445 dated the 19th Feb: 1907, from the President of the Chinnoga Town Municipal Board, submitting proposals for improving the sanitary condition of the town

Note.

The President of the Chinnoga Town Municipality has submitted a copy of the Proceedings of an Extra-ordinary meeting of the Board as also a copy of the report of the Chairman of the Town Improvement Committee for favourable consideration

2. The Scheme for improving the town is roughly estimated to cost Rs 23,000/- as follows:-

- (1) Acquiring and dismantling 3011 houses

3. Serial numbers in ms, etc., to be always entered.
4. Dates of important documents referred should be given.
5. Write on both sides, leaving the same side as margin.

in the congested parts of the town - - - -	Rs 9000
2) Opening conservancy lanes & extending roads in the town - - - -	1000
3) Compensation for 100 acres of land to be acquired for building 500 houses in the Extension - - - -	2000
4) Sinkhole wells in the Extensions - (Lumbum) -	8000
5) Laying out roads and conservancy lanes in the Extensions (Lumbum) -	3000
Total Rs 23,000	

3. The Board have approached Government for the above sum and have applied for sanction to the retention of the temporary establishment allowed for working out the Extension scheme for an other six months.

5 The sanitary improvement of
the Thumaj town is a matter
of great necessity. Year after
year the town has had a
severe recrudescence of plague
for some time past. Even now,
M. Laque cases are being
reported, tho' the plague
season is nearly over. Without
substantial help from
Govt, it is not possible to do
much. Thumaj is an unhygienic

importance of the cities of
Bangalore and Mysore. As
such, it seems to deserve
generous treatment in view
of the needful help to
improve its present wholly
unsanitary condition. The
town by its situation is
naturally unhealthy. Other
removable causes have
contributed to aggravate
the evil.

A grant of the whole of
the amount required is I am
afraid too much to ask from
Government. I submit that
help similar to that given
to Bangalore may be
afforded to this town - i.e.
of the amount required, one
half should be a grant
while the other half should be
a loan repayable in easy
instalments.

If my proposal meets
with favor, the Sanitary
Commissioner will pay
an early visit to the place
and in consultation
with the present Dy. Commr
Mr. J. Varma Rao
make a definite scheme.

- mention as regards what
has to be done & what relief
has to be given - As far as I
can at present see, the
proposals before have
seem moderate and suitable.

S Pending final order, the
temporary East migration
may be kept on till
the end of June next.

prepared by Mr. Nagarajan for drain-
ing the town and also to the Govt.
order no. 523-6 dated the 6th June
1895 ^{P.M.D. 3086-9} wherein the Government promised
to sanction a project for the
main drainage of the town at a
cost not exceeding Rs 60000/- one
half of the cost being treated as a free
grant-in-aid to the Municipality,
and the other half as a repayable loan.
The scheme now proposed is estimated
to cost Rs 80000/- The Municipal
Board request that the required
sum may be advanced by Govern-
ment and one-half of it be treated
as ~~repay~~ a loan to the Municipality
repayable in 30 years.

13
To enable them to provide
for the repayment of this loan
of Rs 40000/- they propose to levy

tolls on carts coming into the town with effect from 1st July 1902 at the following rates:-

- (1) Carts drawn by one or more bullocks - when full } 0-4-0
- (2) do do when empty } 0-2-0
- (3) do drawn by one bullock when full } 0-2-0
- (4) do do when empty } 0-1-0

It is not however stated what amount is expected to be realized from this proposal

Perhaps a doctor calling for this information. The Sanitary Council's opinion will be read in the meantime.

20 The former President asked for Rs 23,500 for town improvement. In addition to this the drainage of the town has been roughly estimated to cost Rs 8000. Both the proposed improvements and drainage scheme have now been strongly advocated by the present Mayor & President, Mr. J. Narayan Rao & the present Town Engineer & Sanitary Commissioner Col. J. Smyth & notwithstanding the cost is proposed to be met from the current revenues of the Board which therefore ask for Rs 8000 only, one half as a grant & the other half as a loan. A distinct source of income is proposed to be newly created from which the loan could be repaid by easy instalments half to the extent of Rs 6000 was promised to go back as in 1895. Office of the President
of the Municipalities
in the Sheringa District

Dated 19th February 1904.

From

N Venkata Rao Esquire
President of the Municipalities
in the Sheringa District

To

L. Anantasaani Rao Esq. B.A.,
Offg Secretary to the Government
of all-India
General and Revenue Dept.

Sir,

I have the honor to submit
herewith a copy of the Proceedings
of an Extra-ordinary Meeting of
the Sheringa Town Municipal
Board held in the Deputy Com-
missioner's Office on Wednesday
the 17th February 1904 together
with copy of a report received
from the Chairman of the Town
Improvement Comm. Mee for
the favorable Consideration of
the Government.

The Board have proposed
to improve the Sanitary Con-
dition of this town which for
a

a long time has been causing great anxiety both to the people here and the Government, by means of relieving the congested parts of the old town by demolishing insanitary houses and removing the families of these houses to extensions proposed in the Proceedings of this Board of 5th November 1903. The copy of the Board's Proceedings now forwarded gives full details of the said Town Extension Scheme the cost of which is roughly estimated at Rs 23000/- which, considering the importance of the object on which it is to be spent does not appear to be heavy.

As full details have been furnished in the accompanying papers, I need only solicit the favor of your placing the matter before Government for their early and gracious consideration.

I have the honor to be

Sir

Your most obedient servant

N. Unnikrishnan

President of the Municipalities
Shimoga District.

Read:- Report dated 15th January 1904 from the Chairman of the Town Improvement Committee appointed in Resolution No. 1 of the Proceedings of the Board dated 5th November 1903 regarding the dismantling of insanitary houses and opening up the congested parts of the town &c and the President's remarks thereon to the effect that the full cost of working out the Town Improvement Scheme in which it is proposed to improve the Sanitary Condition of the town by opening up congested parts by means of extensions, has not been shown in the report; that the cost of the large extent of land which the Board has yet to acquire to provide sites for at least 500 houses in the extensions be

cost

Cost of giving wells for these houses and the cost of laying out roads conservancy lanes and constructing drains should be estimated and added to the cost of acquiring and dismantling the houses in the old town so as to show the full cost of working out the Extension Scheme to enable the Board to know for what money grant it has to apply to Government.

I Resolved - That for the present, land for 500 houses to be built in the proposed Extensions be acquired in addition to the extent already at the disposal of the Board which provides sites for a hundred houses.

That the said 500 houses shall consist of
150 houses of the 4th class
200 houses of the 3rd class
100 houses of the 2nd class
50 houses of the 1st class.

referred to in the Board's Proceedings of 5th November 1903 requiring 6, 42, 28 and 19 acres of land respectively in addition

to about 5 acres required for ponds and Conservancy lanes.

That the Cost of acquiring the above extent (100 acres) of dry land, be estimated at 2000/- Rs., assuming the value of an acre to be Rs 20/-

II Proposed by Mr. Balakrishna Rao and seconded by Mr. Harwan Ali Vice President, that a lump sum provision of Rs 8000/- be made for the wells to be sunk in the extensions and included in the total estimated Cost of ^{the} Scheme the no of wells to be thus sunk being determined later on, and

III that Similarly a lump sum of Rs 3000/- be provided in the Scheme for laying out roads, Conservancy lanes and constructing drains in the extensions

Resolved that the above estimates be approved and included in the Cost of the Scheme (The Board believe that the Cost of sinking a good well at Narsinga even exceeds a 1000/- Rs.).

Proposed by Mr. Balakrishna Rao
and seconded by Mr. Harvanthi
that the small amount expected
to be realized by the sale of sites
be not deducted from the total
cost as the same will be required
for sundry expenses connected
with the working out of the scheme

Resolved that the above suggestion
be approved.

V The Board thus finds that the
total cost of working out the scheme
comes to Rs 23000/- as detailed below

Acquiring and demolishing
381 houses in the congested
parts of the town, vide re-
port of Chairman of the
Town Improvement Com-
mittee.. .. Rs 9000

Opening Conservancy lines
and extending roads in
the town.. .. Rs 1000

Compensation to be paid for
100 acres of lands to be
required for 500 houses
in the Extensions Rs 2000

Sinking wells in the Extensions Rs 8000
 Laying out roads and Con-
 servancy canals &c in
 the Extensions " " Rs 3000
 Total Rs 23000

VI To meet the above cost, the Board
 resolve to Submit the Town Im-
 provement Committee's report to
 Government and to approach it
 with the request that it may be
 pleased to sanction a grant of Rs
 25000 for rescuing the town of Shri-
 which is the 3rd town in importance
 in the Province from the annual
 ravages of epidemics which have
 largely thinned its population

The Board after careful
 deliberation have adopted the
 present scheme of improving
 the town by means of Extensions
 and by relieving congested parts
 for the following reasons: -

The question of finding an
 effectual remedy for the insalubrious
 conditions of this town has cost
 Rs. 10000 (est.).

the attentions of several District Officers and Government and much has been done to improve the town but the result has not been commensurate with the efforts made and the money spent to check the inroads of epidemics.

It was the opinion of some that the salvation of the town lay only in constructing a long and costly drain along the whole length of the town parallel to the river to carry off its sewage and discharge it into the river far below^{it}, as at present all the sewage flowed into the river in the higher portions of the town and rendered its water which the citizens drink impure and dangerous to health. Such a drain with other necessary improvements would cost more than a lac of rupees.

The above scheme however did not commend itself to the Board for the following reasons:-

It is a well known fact

that the subsoil of almost all old native towns is saturated with the sewage of centuries which has soaked into the ^{ground} ~~country~~ and is in a highly decomposed state and that such a soil is most congenial to the multiplication of disease germs. Any white-washing of the surface would be utterly useless, while the subsoil to a considerable depth has become the nursery of poisonous microbes. This consideration alone which appears to be quite convincing led the Board to propose the present scheme of transplanting as many families as possible out of the old town into fresh and pure soil of the proposed extensions and opening up its congested parts by demolishing insanitary houses and laying out roads and conservancy lanes, as being much less costly and more effective than the drain scheme. The utility of

of which is shown above.

In the above circumstances the Board resolve to respectfully urge upon Government the necessity of generously aiding it with the money grant now applied for with as little delay as possible to prevent the further ravages of plague and other epidemics from which this unfortunate town has so long suffered. This small outlay sanctioned in time might prevent the spending of a much larger sum made up of annual expenditures on account of plague on measures of doubtful efficacy.

Proposed by Mr. Bala Krishna Rao and seconded by Mr. Bhama Rao that the temporary establishment sanctioned by Government in their Proceedings No. $\frac{2282-3}{2.7.1902}$ dated 12th December 1902 for working out the Extension Scheme be,

Continued for another six months
and that Government be re-
quested to sanction the same.

Resolved that the continuance
of the establishment for a further
period of six months being
necessary for working out the
Extension Scheme, Government
be asked to sanction its con-
tinuance for that period.

Sd/ N. Venkata Rao.

President of the Shunoga
Municipality

Copy

N. Chinubabu

President of the municipalities
in the Shunoga District

To

The President of the
Shimoga Municipality

Sir,

We the members of the Town Improvement Committee beg to submit our report on the work done by us in the matter of the opening out of the congested parts in the Town of Shimoga

2 To facilitate our work and to avoid confusion, we divided the town into ten blocks. The details of this partition and the boundaries of the various blocks are given in the Schedule A hereto appended.

3 We commenced the inspection of block No I on 12th November 1903 and completed it the very day. The number of

houses named to be demolished
the probable cost of acquiring them
and the area covered by them
all are given in the statement
hereto annexed. This block pre-
sented no difficulty inasmuch
as the houses herein have generally
compounds of varying sizes. We
propose to demolish only such of
the houses as are likely to prove
to be of value to the adjoining
houses by extending the open site
already belonging to these houses.

4. Block No II was inspected
on Monday the 16th November 1903
As stated above the accompanying
statement gives the details. A
portion of this block is very congested
The houses which are generally thatched
ones are so packed together and
the lanes and bye lanes so narrow
and crooked, that the whole pre-
sents the appearance of a labyrinth.
We have proposed to demolish some

Canals for the purpose of opening out a road to connect the Eastern boundary of block No I with its western boundary. There are again a number of houses and vacant sites that are in arrears of the Mohatarfa revenue, we did not think of acquiring them as we thought it proper to sell them for arrears and purchase them for the Municipality. The inhabitants are generally Mahomedans and they evinced a great delight when we told them that the Congestion would be removed and their surroundings improved.

5 The next inspected Block No III on 19. 11. 1903. The statement referred to above gives the details of inspection. Only the Western portion of the block is much Congested and relief is of an emergent nature. There is no necessity to open out any new

roads here excepting a Con-
servancy lane from the Tigar
Street to join the main road near
Kollurak's Talukkhana

6 Block no IV formed the next
place for our inspection. This brings
us to the very heart of the town.
It is here and in block no VI that
Plague first broke out and every
recrudescence first commences.
The houses here and also in block
no VI are generally tiled ones and
are pretty costly buildings - both
on account of their situation
and their dimensions and
structural nature. The statement
as usual gives the details of the
houses to be acquired. We propose
to open out a Conservancy Lane
parallel to Beotar Kere, and also
to connect the Avina Kere road
with the Dodda Petta by running
a road near Belapur Keriappa's
house. Acquiring these houses
we shall have rendered the same

223

Bestar Kere and Yele Revanna Kere which are very narrow and extremely curved, and the houses have hardly any backyards, and besides a Conservancy road just behind the Eastern row of houses in Doddapetta. Commencing from Yele Revannakere and ending in Dodda Bestar Street is most absolutely necessary and should be opened. Conservancy lanes are likewise necessary in the following places:-

- (1) from Revannakere to Anavirappanakere.
- (2) from Anavirappanakere to Nagappanakere and
- (3) between Nagappanakere and Harappanakere.

These lanes give much facility to keep ~~at~~ the backyards of houses free from filth which can be removed daily or as often as possible.

7. Block No. I was inspected on 20.12.1903. In this block the majority of the houses are thatched. Their situation is rather of a

objectionable nature. They are interspersed between the Taluk Cutcherry, A.V. School, Students' Home and the Town Hall. On this ground and on the ground of their insanitary state, we condemned them. Some of these dirty huts are within a few feet of the above named public buildings and some huts are also near the Road to District Office.

28 We Commenced inspection of block no VI on 23.12.1903 and finished it on the 26th Idem. It is here also as in block no IV that plague first broke out and it is here as it is in Block no IV. that the recrudescence always first commences. The statement annexed gives the details for requisition. The houses are so packed together that the inner apartments are devoid of any ventilation. We accordingly propose the requisition of the houses with the.

the object of giving the other houses
an opportunity to open out windows
We also ^{propose} to connect Rangare Kere
Road with the Tumkur Shamara
street by removing the only house
in the Western row of the Petta. This
will increase traffic in the Kum-
bargundi and thereby minimise
the evils of a neglected portion of
the town. It will also divert to
some extent the traffic from the
Big Brahmins' Street and thereby
remove the evils of heavy and
more than desirable traffic. We
propose removing most of the
huts in the Upparwadi which is
very much congested and where
too many cases of plague deaths
had occurred, we propose ex-
tending the road, running from
Yeldevannakere to Kariyappa
Kere road passing in the Uppar
Street and a Conservancy Lane
to join this road to the South run-
ning from Muzza side

7 Block no 7 was the next to be inspected which we did on 29.12.1903 The important portions are Bij Bahadur Street and part of Krishnarajapur Street. The former is much congested. The other portions of the block are not so badly in need of opening out. The statement gives the details. There was no necessity to lay out any road here as they have conservancy lanes one at Kunbar Gundi and the other on the bank of the river.

10 Block no VIII is not much congested. It was inspected on the 31st December 1903. In Clarke Petta we propose to widen our road which is to be done by acquiring the houses and sites mentioned in our Proceedings of 31st December 1903 We also propose to lay out a conservancy lane between Carpenter's Street and Suman Shama Rao's Street.

11 Block no IX was inspected on 9.1.1904 Big Brahmin street portion of the block and the Kumbhar Kere and Kere Durgammankere ^{portions} are very much crowded. By acquiring the houses detailed in the statement, we propose not only to remove Congestion but also to lay out Conservancy lanes. The majority of the houses in Kere-Durgammankere are thatched ones and in a very insanitary state Since the outbreak of plague the inhabitants of these houses are living in health camps erected outside the town There will not be, we hope, any difficulty in asking these people to go to the extensions.

12 Block no X Durgifudi, Islapur were inspected on 19.1.1904. The Congestion is not much and we accordingly propose to acquire only a few houses to remove Congestion. The statement gives the details

13 In all our Proceedings, we had two objects in view (1) opening out of the Congested portion and (2) laying out roads.

The first object we intend securing by removing a house or two in a Congested portion and thereby give relief to the neighbouring houses. The site thus acquired will have to remain vacant. The Municipality should have in them the power of giving it over to a neighbouring house owner if the latter undertakes to keep it open and also in a good sanitary state. This policy will secure to the Board the advantage of an open space without the attendant responsibility of keeping it clean. It will also be a greater benefit to the neighbours to have it owned by some one of them, as it would not then be regarded as the property of no body and as one where anyone of the public may

may do what best he thinks^{it} of doing. During our inspection we came across with some of the citizens who were ready to take up such places on the conditions mentioned above. In the matter of laying out new roads, our proposals are very few as we have already sufficient number of roads. Our proposals relate either to the laying out of the Conservancy lanes or to the connecting of two important roads by means of extending one of these by a few yards. We have not accordingly added any appreciable length to the total length of the existing roads. We have been in this matter as in the matter of acquisition so very cautious that we never ventured to make any proposal to open out a new road until we were thoroughly satisfied of the sheer necessity therefor.

14. Lastly with reference to the

estimated value of the houses and sites to be acquired, we have fixed the valuation of the sites at the rate of 3 pias per square yard. The tiled houses are valued roughly at Rs 10 to 25 an ankana and the thatched houses at Rs 2 to 3 an ankana. The owners of the houses will of course take away their materials. Our estimate therefore, rightly represents the probable cost of reconstruction.

15 With regard to the two Chowks (in front of the Police Station and near Upparkere) in the main Bazar we beg to state that after acquiring the houses therein as detailed in our statement (blocks IV & VI) some ^{small} stalls may be created at the cost of the municipality and rented out to the merchants. This will secure the desired end, namely of preventing the shopkeepers from converting their premises into

into their habitations

76

We conclude this report by stating that we propose to demolish 389 houses the estimated cost of which comes to about Rs 7000—when the Board resolve to do so our further work will be to find out places for such of the people as are deprived of their houses and also for such of those as are desirous of building in the extension. It is not out of place to note here that as the sites in the present Durgjudi Extension would not be sufficient for the applicants to build houses in the Extension the dry land ^{just} behind the old Durgjudi which is well suited for building houses may be acquired in due course.

From .

M. S. Narayana Rao, Esq.
President of the Municipalities
Shimoga District.

To,

L. Anantasami Rao, Esq.
Off^y Secretary to the Govt.
of Mysore, Genl. and Rev.
Departments.

Sir,

With reference to Govt: Pro: No

✓
3532-5 , dated 16th March 1904, requesting
L.S. 137:- 02
to submit a joint report in consultation
with the Sanitary Commissioner, on the
question of opening up the Town of Shimoga,
I have the honor to submit herewith, for
orders, extract of para 8 of the Pro: of the
Municipal Board held on the 30th ultimo,
and to state that I have requested the
Sanitary Commissioner to move Govt: to
grant 80,000 Rupees for drainage works
and

and other sanitary improvements of the Town, ³⁰¹ as
resolved in the meeting. —————

I request that when the matter comes,
up, early orders may be passed, as the drainage
scheme and other improvements proposed to
be effected, are matters of very great urgency.

2. I beg also, that sanction be accorded
to the levy of tolls as proposed by the Board
to provide funds for repayment of loan, which
it is proposed — Govt be moved to grant.

3 A copy of the Executive Engineer's
memorandum is also submitted for the
information of Government.

I have the honor to be,

Sir,

Your most obedient servant,

Musaragunhan

President. of the Municipi-
palities, Shimoga District.

For

Extract from the Proceed-
- ings of an ordinary meeting
of the Shemoga Town munic-
- ipal Board held in the Deputy
Commissioner's Office on
Saturday the 30th April 1904
at Shemoga.

* * *

8 Read Executive Engineers
memo received with his
docket N^o 313 dated 10th April
1904 on the subject of the draining
of the Shemoga town.

Read also Proceedings of
Government N^o 3532-5 dated
16th March 1904 ¹³⁷⁻¹⁹⁰² regarding the
proposals sent up for opening
out and improving towns.

Resolved.
1st That Government be-
moved to give 80,000 Rupees for
drainage works and other sanitary
improvements of the town, —
Combined, half of which as a
grant

of Rs. 1000/- and to the municipality
and the remaining as a loan
repayable in 30 years. Detailed
estimate for the works will be
sent in due course

2? In order to provide funds
by which the municipal Board
will be able to repay the loan
and to supplement the amount
that Government are asked
to give tolls be levied on Carts
coming into the town with effect
from the 1st July next at the following
rates

- 1 Carts drawn by one or more
pairs of bullocks when full
4 annas (four)
- 2 Carts empty, two annas
- 3 Carts drawn by one bullock
when full 2 annas
4. Carts when empty, one anna.

(Signed) Mr. S. Narayana Rao
President of the Shamasa
Municipality

Exhibit -

M. S. Narayana Rao

President of the Municipality
in the Shamasa Dist.

For

Memorandum on the Drainage of the Town of Shemoga.

In 1863 Dr. Whitten
Assistant Surgeon while
describing at great
length the unsanitary
condition of Shemoga,
aptly remarked "The
two elements moisture
and rank vegetation,
when exposed to heat
are certain to generate
disease and these two
elements we have in
profusion at Shemoga
Drainage and the
prevention of an excessive
growth of vegetation are
the two measures
urgently called for in
Shemoga.

Since these remarks
were penned, a re-
gular municipality
with pretty decent
income and with
conservancy estab-
lishments

Establishment has
been instituted &
new roads have been
opened street drains
provided, obnoxious
and stagnant pools
have been filled &
unoccupied spaces
built up in some places
and the health and
convenience largely
improved but the
two crying evils of
this important town
third as regards
population in the
Province - remain
unremedied "defective
drainage and want of
a wholesome supply
of drinking water."

As the remedy of the
first evil will go a
great way to increase
the purity of the exist-
ing water supply drain-
age is of greater

importance

urgency that the water supply scheme for Shemaya situated as it is on the banks of the river Tunga.

It is unnecessary to attempt here any précis of all that has taken place in connection therewith from 1863 to the present time.

This will be simply swelling the file on the subject without adding anything to the tangible realisation of the project. Suffice it to say that after repeated representations

Government in their orderings N^o 523-3086-6-9 of 22nd June 1895 were graciously pleased to promise that Government will be prepared to sanction

a drainage scheme
providing for the
drainage of the
Town and enjoining
that it must not cost
more than 6000 Rs.

one half of this
Government undertook
to give as a grant
in aid to the municipality
and the other
half as a recoverable
loan. The Sanitary
Engineer was re-
quested to submit
a project very early,

The Sanitary
Engineer did not
make much in the matter
and the urgency of
the work was more
than ever brought
home to him.

For some reason
or other the Sanitary
Engineer

Engineer delayed his inspection till - December 1894.

In the meantime Mr. A. S. Nazarkar Executive Engineer had got up a scheme for draining the town. This amounted to 1,19,333 Rupees. The plans estimates and report comprising this project were handed over to the Sanitary Engineer in December 1894 and he was required to scrutinise and modify the project if necessary, but beyond observing that for a population of 10,000 the cost of 1,20,000 was prohibitive, that he did not approve of

of

of the combination of
surface drainage
and sewage and that
the plans and estimates
got up so far could
only be of help in
measuring a system
more in keeping with
present Indian prac-
tice and within the
means of the local mu-
nicipality, the project
was shelved and
seemed as remote
from realization as
it was in 1863 after a
period of nearly 40
years spent in mere
correspondence.

It is now felt that
this sort of thing must
cease and that some
prompt action must
be taken to remedy
the matter in full view
of the disastrous effects
of repeated recurrence
of plague in
the unhappy town.

Yours truly

Sufficient information has been gathered by Mr. Nazarkar. A Comprehensive map of the town shewing levels of all principal points has been got ready. The lines for the main, sub-main and levels of junctions and line of out-falls have all been settled. The position of these sewer works have been shown on enlarged survey plan of the town shewing the houses thorough-fares etc. The areas of the different blocks into which the town is required to be divided, for purpose of drainage, the probable run off from these areas at $\frac{1}{2}$ per hour and the

2020

Size of street drains
and sub mains necessary
have been Calculated
and Tabulated

The total area of
each of the 3 districts
into which the drainage
naturally divides itself
its population and
sewage discharge ^{area}
section of main nec-
essary have been fixed
but owing to reasons
not apparent over
sewers with brick
on Chumam side
and bottom have been
adopted and the ^{radius}
fixed arbitrarily
for $\frac{1}{2}$ " and $\frac{1}{4}$ " run off
for sub mains and
mains junction work
have been made
more elaborate than
what will be needed
actually During the
several years the
project was in course

of

of development the actual proportion of run off in Shemoga town could easily have been scientifically settled by gauging floods through small tunnels in the town area and the fundamental data.

turn on which the project hangs could have been put on a basis beyond the possibility of any doubt. We could then have avoided either extravagant expenditure or insufficient section of drain. As at present conceived the whole thing — requires revision in the light of each examination early next monsoon.

But this does not prevent

prevent a rough
-proximate cost of
various items of
main drainage etc.
being put down in
light of the available
information with the
nearest possible
approach to the actual
cost so that the same
may be entered a-
gainst the project
in the next Santa-
Barbara and a pre-
liminary grant to
be made for the work
so urgently necessary,
but so long delayed.
The present memo
drawn up specially
with this object in view
is not to be considered
an exhaustive
report explaining
the salient points
of the project and
the scientific con-
-siderations involved.
There is

46

thereon. The details
estimates and plans
will be matured
before end of August
and submitted for
sanction of Govern-
ment in time to allow
of works being com-
menced early in
November after mon-
soon

rough estimate for
main Sewer.

The total length
of main sewer re-
quired is 6930 Rft.
or nearly 1 mile 2-
furlongs and 110 Yards

The lengths in each
District is appended

No I 2760

No II 2968

No III 1202

The Catchment area
of the three Districts are

I 158 acres 24 Sq miles

II 131 acres = 20. do.

III 53 acres = 08 do.

Total 342. 52 Sq miles

Assuming

Assuming a run off
of $\frac{1}{24}$ " per hour to be
passed in the main sewer.
(a section more than
ample for all sewage)
the quantity of discharge
to be allowed for will
be 7. 12. 15 cft. per

second respectively,
in different districts

3 feet is the mean

mean velocity at which
the drain will be self
cleansing. Allowing

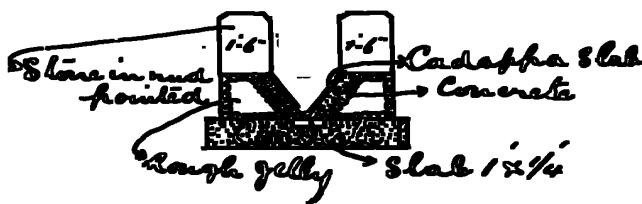

this velocity we require
the following section
for the main sewer.

$$\text{No I District } \frac{1}{3} = 2\frac{1}{2} \text{ cft.} \\ = 1\frac{1}{2} \times 2.$$

$$\text{No II Dist. } \frac{12}{8} = 1\frac{1}{2} = 2 \times 2$$

$$\text{No III - do - } \frac{5}{3} = 1\frac{2}{3} = 2 \times 2\frac{1}{2}$$

The section in No II
District may be taken
as the average for the
whole. Adopting the
marginally noted
section for the sewer.
it is found that

Cost per Yard ^{of} would
Rs 9 or Rs 3 per R. ft.

At this rate 6930 R. ft.
are estimated to cost
Rs 20490 or Rs 21000 in
round numbers

To make allowance
for inequalities of
ground banking in
low places, side rework-
ments in deep cutting
another 5000 Rs may
be added to the cost
The main sewer can
be done at Rs 26000.

This cost may be
considerably lessened
by variation of section
not by Districts, but
for each block by
augmenting it from
a minimum at 0 to a
maximum at the sole
of the main sewer. The
exact amount of
reduction can be
ascertained when
working out the details.

The

Estimate for sub mains The lengths of
sub mains in the
present District
as noted below

I = 13753

II = 14638

III = 1220

Total 29611 Rft.
Without entering
the minute details
each block, it is
stated that the
sub main will have
drain 12 acres and
discharge 5 cft. per
second. ^{This can be proved} which we
easily get as the
drained slopes are
from North to South
3 ft of drain of
shown in the margin.

will cost Rs 4.12-0-0
per Rft. or Rs 1-8-0
per Rft. very nearly.

The total cost of
29611 Rft. at 1-8-0
per Rft. would.

Rs 44,416 or 45000

round

ound numbers.

This average cost can be kept down considerably by a judicious variation of section of drains for each block or portions of blocks as the area to be drained increases without adopting the same section for considerable length.

estimate for junction
works and cut falls.

the with a locality
36 feet across

As per Mr. Nagobhan estimate, these are estimated to cost — Rs 22486 but as in main sewer and sub mains, we do brick work with deep foundations and elaborate designs are adopted, much simpler drops, trapping Weirs and silt traps as in ^{the} Mysore town drainage could with advantage be adopted. Thin slabs are more impervious to water and

and are unaffected
by sewage and will
be immensely more
lasting than brick
and cement sewers.
The cost of these func-
tion works can be
reduced to Rs 10,000
at the most

The entire scheme
of open sewers, both
main and sub main
with junction works
and out falls can be
confidently hoped to
be completed -
at a cost of Rs 26,000
for main, Rs 48,000
for sub main, Rs 10,000
for junction works.
Rs 81,000

In round numbers
eighty thousand
Rupees will be required
to carry out the main
drainage. This
cannot be con-
sidered.

Considered an exorbitant amount when the area drained is 34.2 acres giving 23 1/4 Rs per acre In Mysore and Bangalore Cities system of Slab drains and sewers etc has cost on an average Rs 400 per acre drained

The most urgent Street drains opening out of Conservancy lanes etc will be carried out by the Municipality out of annual grants from Municipal funds during the 2 or 3 years that the drainage project is in course of completion

General No. *9595* *Bangal*

No.

Enclosure No. *4*

Submitting a file of papers with a report relating to the proposals for the improvement of the Shemoga tower.

No. 575

Dated 8th June 1921.

From

Lt. Col. John Smyth M.D., I.M.S.

Offg. Senior Surgeon and Sanitary Commissioner
with the Government of "H." the Maharaja
Mysore, Bangalore.

To

L. Anantaram Rao Esqr, B.A.,

Offg. Secretary to the Government of "H." the
Maharaja of Mysore, General and Revenue
Departments, Bangalore.

Sir,

In forwarding the accompanying papers (vide margin),

I have the honor to state that as I was not intimately acquainted with the town of Ghemoga I went and enquired locally into the matter at issue, namely, the proposal of the President as contained in the enclosed papers, to thin out the houses in various parts of the town, for which he asks a grant from Government.

2. I can only say that I very cordially support the President's appeal. It would be hard to conceive a better plan for the improving of the town than that proposed by him for the money he proposes to spend.

3. The houses and back-yards are now in such a tangled mess, difficult of definition, and overgrown with rank unhealthy vegetation, that the very sight of them is enough to

depress the most enthusiastic sanitarian. However, after the

100/100/100

Letter by 25th dated 9th May 1921 from the President of the Municipalities in the Mysore District to the Lt. Col. Smyth, I.M.S., dated 14th May 1921, is the Secretary to Govt of Mysore. It is the proceedings of an extraordinary meeting of the Mysore Town Municipal Board. It is the Chairman of the town improvement committee. (It is obligingly returned)

proposed thinning out has been effected things will assume quite a different aspect.

4. The sin of the people of Shemoga - I mean ~~of~~ the bulk ^{dis} of the population is their utter ^{dis}regard of tidiness in their back-yards, whereby close rankweeds are allowed to over-run the place *and harbour vermin*. One doesn't care to recommend compulsory measures in such a case, but in proportion as this "cover" is allowed to remain, by so much will be *rendered* *superfluous* the house thinning proposed.

5. It is such a trifling matter - this mere tidiness. Ten minutes a day by a single man or woman for that matter would suffice to keep down this wild growth, and the people seem to make no attempt. However, there is sufficient power invested ^{by law} ~~by~~ laid in the President's hands to compel, if necessary, householders to keep their gardens tidy, and I have no doubt the present President, enthusiastic sanitarian as he is, will not fail to use these powers if he finds *persuasion* fail: he will not let his own efforts and the expenditure of public money be ~~and~~ *of* result for the sake of causing a little temporary growling on the part of certain thoughtless and careless towns-people.

6 Then again, an important point is the maintaining of an even, though ~~withal~~ an undulating surface everywhere within municipal limits. At present after every shower thousands of pools of various sizes are formed which are a fruitful source

of disease. Unceasing efforts should be made in this direction: Every inequality likely to encourage stagnation of water and prevent its flowing readily into the drains ^{intended} ~~whereon~~ to carry it off should be forthwith filled up. and that, not by digging new pits, but by a judicious lowering of neighbouring mounds, or by carrying material from that ~~inexhaustible~~ source, the bed of the river.

7. No one knows better than I what incessant care and observation, and pushing, and perhaps driving, will be necessary to effect this - absolutely unremitting. All this Mr. Narain Rao will do - but who shall say whether his successor will be equally zealous - and it is dispiriting and disheartening to take this view of the affair - and one can only hope that Government above all things shall see to it that Officers appointed to that District will be like-minded with the present president and thus insure a continuation of his humanitarian policy.

8. Although hardly directly a part of the present matter I may be permitted to refer to the excellent project now in embryo which is occupying the President's attention, viz:- the construction of a broad promenade along the river embankment throughout the whole length of the town proper.

9. This will form a most useful breathing place for the people, as well as serve in ~~a~~ ^{an} effectual manner to prevent the pollution of the bank of the river, and thus add ~~enormously~~ to

the

the healthfulness of the place.

60

10. Nor does it form part of the present subject to mention the long standing proposal to establish a system of drainage along the side of the ridge remote from the river and on which so much of the town is built. Along here is a valley whose condition must always be unhealthy till a drainage scheme such as that proposed is carried out. It will be costly - not under a lac of rupees in my opinion. But I consider that public funds may well be asked to contribute materially. I think speaking generally that public money is well spent when spent on our large town in carrying out radical and lasting sanitary improvements - The prosperity of the town is the prosperity of the country villages. Keep them healthy and the villages will be healthy too, at any rate in regard to epidemic disease. Shimoga deserves to be regarded as one of our important centres, and may well share, with Mysore and Bangalore, a portion of the public funds.

I have the honor to be,

Sir,

Your most obedient servant,

H.D.

Lt. Col. I.M.S.

Offg. Senior Surgeon and Jany. Commr.,

Depo. 662
14/5/04
N^o 2480

Office of the President
of the municipalities
in the Shemoga Dist.

Enc. N^o 3

Dated 9 May 1904.

From
Mr. S. Narayana Rao Esq.
President of the municipalities
in the Shemoga District

To.
Lt. Col. J. Smith M.D. J.M.S.
Off. Senior Surgeon and Sanitary
Commissioner, with the Govern-
ment of Mysore

Sir

With reference to Proceed-
ings of Government N^o 3532-5
L.F. 137-192
dated 16th March last, a copy
of which has already been
sent to you, I have the honor
to forward the marginally
noted papers regarding -
sanitary improvements pro-
posed to be effected in the
Town of Shemoga, including
the

the carrying out of a system of drainage

2. It was at first thought a sum of Rupees 23000 would be wanted for the opening out of congested parts and the laying out of extensions.

In accordance with the Executive Engineers memorandum a sum of 80,000 Rupees is also wanted for the drainage scheme. Both are matters of urgent and absolute necessity.

The Board however just now want only 80,000 Rupees half of which to be a grant-in-aid and the other half a loan to be repaid in 30 years. They expect that by effecting economies in carrying out the drainage scheme, about 10,000 Rupees will be saved and even if this cannot be done, the sum wanted to complete the scheme and for that of opening out the town will, they consider be met from current revenues of

of the next few years supplemented as they will be by additional taxation proposed to be levied to meet this expenditure

I understand you have inspected the Town and have been assured of the urgent necessity of carrying out the works proposed to be undertaken. I beg therefore you will move Government to render the help solicited by the Municipal Board. The funds wanted have to be provided in the Provincial Budget for 1904 - a proposal for which have to be sent in before the end of May the latest. I beg therefore you will kindly send up the papers, with your

Yours faithfully

Support to Government as —
early as possible

I have the honor to be

Ever
your most obedient servant

Respectfully
President of the mun-
icipalities, in the Shenago Dist

Yours

N^o 445
85 Office of the President

To

L Ananthasamy Rao Esq^r
offg Secretary to the Govern-
ment of Mysore.
General and Revenue Dept.

Sir
I have the honor to
submit herewith a copy
of the proceedings of an
Extraordinary meeting of
the Shemoga Town Muni-
cipal Board held in the Deputy
Commissioner's office on
Wednesday the 17th February
1904, together with copy of a
report.

report received from the —
Chairman of the town improve-
ment Committee for the favora-
ble consideration of govern-
ment.

The Board have proposed,
to improve the sanitary condition
of this town which for a long
time ^{has been} causing great anxiety
both to the people here and
the government by means
of relieving the congested
parts of the old town by
demolishing insanitary
houses and removing the
families of these houses
to extensions proposed
in the proceedings of this
Board of 5th November 1903.

The Copy of the Board's pro-
ceedings now forwarded gives
full details of the said town
extension scheme, the cost
of which is roughly estimated
at Rs 23,000, which consi-
dering

Considering the importance
of the object on which it is to
be spent does not does not
appear to be heavy.

No full details have
been furnished in the
accompanying papers
I need only repeat the
favor of your placing the
matter before Government
for their early and gra-
cious consideration

I have to

Non official members.

Mr. A. Ramappa

Mr. Syed Mohadeen Saib

I Read - Report dated 5th January
1904 from the Chairman of
the Town Improvement Com-
- mittee appointed in Reso-
- lution no 1 of the proceedings
of the Board dated 5th November
1903 regarding the disman-
- tling of insanitary houses
and opening up the Conges-
- ted parts of the town etc
and the President's remarks
thereon to the effect that
the full cost of working out
the Town improvement scheme
in which it is proposed to
improve the sanitary condi-
- tion of the town by opening up
congested parts and by -
means of extensions, has
not been shown in the report,
that

11
that the cost of the larger
extent of land which the
Board has yet to acquire
to provide sites for at least
500 houses in the extension;
the cost of growing walls for
these houses and the cost
of laying out roads, conser-
-vancy lanes and construc-
-ing drains should be es-
-timated and added to the
cost of acquiring and dis-
-mantling the houses in the
old town so as to show the full
cost of working out the Extension
Scheme to enable the Board to
know for what money grant
it has to supply to Govern-
-ment.

Resolved — That for the
present land for 500 houses
to be built in the proposed
extensions be acquired
in addition to the extent already
at the disposal of the Board
which provides sites for
a

for a hundred houses.

That the said 500 houses shall consist of -

150 houses of the 1st class
200 houses of the 3rd class
100 houses of the 2nd class and
50 houses of the 1st class
referred to in the Board's pro-
ceedings of the 5th November
1903, requiring 6, 42, 28 & 19 acres
of land respectively in addition
to about 5 acres required
for roads and Conservancy
lanes

That the Cost of acquiring
the above extent (100 acres)
of dry land be estimated
at 2,000 Rupees assuming
the value of an acre to be
20 Rupees.

Proposed by Mr. Balakrishna
Rao and seconded by Mr.
Hajran Ali Vice President
That a lump sum provision
of Rs 8000/- be made for
the wells to be sunk in the
extensions

extraneous and included in the total estimated Cost of Scheme the number of wells to be thus sunk having determined later on, and that similarly a lump sum of Rs 3000 be provided in the scheme for laying out roads, Conservancy lanes and connecting drains in the extensions. Resolved that the above estimates be approved and included in the Cost of the Scheme (The Board believe that the Cost of sinking a good well at Shemoga even exceeds a 1000 Rupees.)

Proposed by Mr. Balakrishna Rao and Seconded by Mr. Hassan Ali that the small amount expected to be realised by the sale of sites be not deducted from the total Cost as the same will be required for sundry expenses connected with the working out of the scheme.

Resolved that the above suggestion

Suggestion be approved.

The Board thus finds that the total cost of working out the scheme comes to Rs 23000/- as detailed below

Acquiring and Demolishing 381 houses in the congested parts of the town vide report of Chairman of the Town Improvement Committee Rs 9,000

opening Conservancy lanes and extending roads } 1,000
in the town - - - - - }

Compensation to be paid for 100 acres of land to be acquired for 500 houses in the extensions - - - - - Rs 2,000

Laying out roads & Conservancy lanes etc in the extensions - - - - - Rs 3,000

Digging wells in the Extensions - - - - - Rs 2,000

Total Rs 23,000

To meet the above cost, the Board resolve to submit the Town Improvement to our - mittee:

Committee report to Govern-
ment and to approach it
with ~~the~~ request that it may
be pleased to sanction a
grant of Rs 25000/- for re-
covering the town of Shamaga-
which is the 3^d town in im-
portance in the Province
from the annual ravages
of epidemics which have
largely thinned its popu-
lation.

The Board after careful
deliberation have adopted
the present scheme of im-
proving the town by means
of extensions and by relieving
congested parts for the follow-
ing reasons.

The question of finding an
effectual remedy for the
unsanitary conditions of this
town, has engaged the attention
of several District officers

and

and Government and much has been done to improve the town but the result has not been commensurate with the efforts made and the money spent to check the inroads of epidemics.

It was the opinion of some that the salvation of the town lay only in constructing a long and costly drain along the whole length of the town parallel to the river to carry off its sewage and discharge it into the river far below as at present all the sewage flowed into the river in the higher portions of the town and rendered its water which the citizens drink, improve and dangerous to health. Such a drain with other necessary improvements would cost more than a lac of rupees.

The above scheme however did not command itself to the Board for the following reasons
It

It is a well known fact that the subsoil of almost all old native towns is saturated with the sewage of centuries which has soaked into the ground and is in a highly decomposed state and that such a soil is most congenial to the multiplication of disease germs. Any white washing of the surface would be utterly useless while the subsoil to a considerable depth has become the nursery of poisonous microbes. This consideration alone which appears to be quite convincing led the Board to propose the present scheme of transplanting as many families as possible out of the old town into fresh and pure soil of the proposed extensions and opening up its congested parts by demolishing insanitary houses and laying out roads and conservancy

Conservancy lanes as being much less costly and more effective than the drain scheme the utility of which is shown above.

In the above circumstances the Board resolve to respectfully urge upon Government the necessity of generously aiding it with the money grant now applied for with as little delay as possible to prevent the further ravages of plague and other epidemics from which this unfortunate town has so long suffered. This small outlay sanctioned in time might prevent the spending of a much larger sum made up of annual expenditures on account of plague or measures of doubtful efficacy

efficacy

Proposed by Mr. Balakrishna
Rao and seconded by Mr.
Bhima Rao that the temporary
establishment sanctioned
by government in their No.
No 2282-3 dated 12th December
L.F. 134-02
1903, for working out the Exten-
sion scheme be continued
for another six months and
that government be requested
to sanction the same.

Resolved that the Continuance
of the establishment for a further
period of six months being nec-
essary for working out the ex-
tension scheme, government
be asked to sanction its Conti-
nuance for that period.

(Signed) N. Venkat Rao

President of the Dharmapuri
Municipality

"Copy"
Mr. H. P. Rao
President of the municipality
in the Dharmapuri District

To

The President of the
Shenaga municipality

We the members of the
Town Improvement Committee
have to submit our report on
the work done by us in the
matter of the opening out of
the congested parts in the
Town of Shenaga.

2 To facilitate our work
and to avoid confusion
we divided the town into two
blocks. The details of partition
and the boundaries
of the various blocks are
given in the Schedule A
hereto appended.

3 We commenced the
inspection of block No I on
12th November 1903 and com-
pleted it the very day. The ^{number} of
houses named to be de-
molished the probable cost
of

of acquiring them the area covered ~~by~~ them all are given in the statement hereto annexed. This block presented no difficulty in as much as the houses herein have generally courtyards of varying sizes. We propose to demolish only such of the houses as are likely to prove to be of value to the adjoining houses by extending the open site already belonging to these houses.

4. Block No II was inspected on Monday the 16th November 1903.

As stated above the accompanying statement gives the statement details. A portion of this block is very congested.

The houses which are generally thatched ones are packed together, and the lanes and bye-lanes so narrow and crooked, that the whole presents the appearance of a labyrinth. We have proposed to demolish some houses for the purpose of opening out a road to connect the Eastern boundary of block

block No I with its western boundary. There are again a number of houses and vacant lots that are in arrears of the Mohatarfa provisions, we did not think of acquiring them as we thought it proper to sell them for arrears and purchase them for the municipality. The inhabitants are generally Mahomedans and they evinced a great delight when we told them that the Congestion would be removed and their surroundings improved.

5. We next inspected Block No III on 19-11-03. The statement referred to above gives the details of inspection. Only the Western portion of the block is much congested and relief is of an urgent nature. There is no necessity to open out any new roads here, excepting a Conservancy lane from the Tizalgar

Tizalar street to join the main road near Kolluranga's Talim-thana

6 Block No IX formed the next place for our inspection. This brings us to the very heart of the town. It is here and in block No VI that plague first broke out and every recedesence first com-

mences. The houses here and also on block No II are generally tiled ones and are pretty costly buildings both on account of their situa-

tion and their dimensions and structural nature. The State-

ment as usual gives the details of the houses to be acquired. We propose to open out a conven-

ience lane parallel to Beshav-hera, and also to connect the Soukakeri road with the Dooda Patta by running road near Balaghar Keshavappa's house.

Acquiring these houses we shall have widened the Samra Beshavheri and Zila-

navamathan

Yylaravannanahen which are very narrow and extremely curved and the houses have hardly any back yards, and besides a conservancy road just behind the eastern row of houses in Daddapetta. Commencing from Yylaravannanaheni and ending in Dadda Restar Street is most absolutely necessary and should be opened. Conservancy lanes are likewise necessary in the following places. (1) From Ravannanaheni to Anave ~~East~~ panaheni (2) from Anave ~~East~~ panaheni to Nagappanaheni (3) Between Nagappanaheni and Karappanaheni. These lanes give much facility to keep the back yards of houses free from filth which can be removed daily or as often as possible.

7 Block N V. was inspected on 20.12.03. In this block the majority of the houses are Thatchra

Thatched. Their situation is rather of an objectionable nature. They are interspersed between the Taluk Katchery, A.D. School Students' home and the Town-Hall. On this ground and on the ground of their insanitary state we Condemned them.

Some of these dirty huts are within a few feet of the above named public buildings and some huts are also near the Road to District office.

We commenced inspection of block no VI on 23rd December 1908 and finished it on the 26th idem. It is here also as in block II that plague first first broke out and it is here as it is in block no IV that the recrudescence always first commences. The statement annexed gives the details for acquisition. The houses are so packed together that the inner apartments are

are devoid of any ventilation
We accordingly propose the
acquisition of the houses with
the object of giving the other
houses an opportunity to open
out windows - We also propose
to connect Kanjancheri Road
with the Junction Shana Rao
Street by removing the only
house in the Western row of the
patta. This will increase traffic
in the Kumbhagundi and there
by minimise the evils of a
neglected portion of the town.
It will also divert to some
extent the traffic from the
Big Mahan Street and —
thereby remove the evils of
heavy and more than desira-
ble traffic. We propose re-
moving most of the huts
in the Appawadi which is very
much congested and where
too many cases of plague
deaths had occurred. We
propose

propose extending the road
running from Yalavannana.
Keri to Karigepantheni road
facing in the upper street and
a Conservancy lane to join
this road to the South running
from Margid side.

9 Block No VIII was the next
to be inspected which we did
on the 29th December 1903. The
important portions are Big.
Krishna street and part
of Krishnarajapuram Street. The
former is much congested
the other portions of the block
are not so badly in need of
opening out. The statement
gives the details. There was no
necessity to lay out any road,
here as they have
Conservancy lanes one at
Kumbargunda and the other on the
bank of the river.

10 Block No VIII is not much congested.
It was inspected on the 31st Dec 1903
In Clarke's letter we propose to
widen our road which is to be done
by acquiring the houses and sites
mentioned in our proceedings
of

of 31st December 1903, we also propose to lay out a Conservancy Lane between Carpenters Street and Jankar Shama Rao Street.

11. Block No IX was inspected on 9-1-04. Big Brahmmin Street portion of the block and the Jankar Shama Rao and Keriadurgamankar portions are very much crowded. By acquiring the houses detailed in the Shabnam etc, we propose not only to remove Congestion but also to lay out Conservancy lanes. The majority of the houses are here our gaminankar and are thatched ones and in a very unsanitary state. Since the outbreak of plague, the inhabitants of these houses are living in health camps erected outside the town.

There will not be we hope any difficulty in asking these people to go to the Extension.

12. Block No X Durginudi Dalapur were inspected on 17 January 1904. The Congestion is not much and we accordingly propose

propose to acquire only a few
houses to remove congestion.
The statement gives the details.

(13) In all our proceedings
we had two objects in view
1) opening out of the congested
portion and (2) laying out roads.

The first object we intend
achieving by removing a
house or two in a congested
portion and thereby give relief
to the neighbouring houses. The
site thus acquired will have
to remain vacant. The munici-
-pality should have in them
the power of giving it over to a
neighbouring house owner, if
the latter undertakes to keep it
open and also in a good san-
itary state. This policy will
be sure to the Board the advantage
of an open space without the
attendant responsibility of
keeping it clean. It will also be
a greater benefit to the neighbours
to have it owned by some one of
them

81
best would be to then allow
the freedom of do
body and as one, where any
one of the public may do what
best he thinks of doing. Having
our inspection we came
across with some of the citizens
who were ready to take up such
places on the conditions mentioned
above. In the matter of laying
out new roads, our proposals
are very few as we have already
sufficient number of roads.
Our proposals relate either
to the laying out of the Conser-
vancy lanes or to the connect-
ing of two important roads
by means of extending one of
these by a few yards. We have
not accordingly added any
appreciable length to the total
length of the existing roads. We
have been in this matter in the
matter of acquisition so happy.

Caution that we never ventured to make any proposal, to open out a new road until we were thoroughly satisfied of the — — sheer necessity therefor.

~~14.~~ 14. Lastly with reference to the estimated value of the houses and site to be acquired we have fixed the valuation of the site at the rate of 3 pies per square yard. The tiled houses are valued roughly at Rs 10 to 25 an ankana and the thatched houses at Rs 2 to 3 an ankana.

The owners of the houses will of course take away their materials. Our estimate therefore rightly represents the probable cost of construction.

(15.) With regard to the two Chowks (in front of the Police Station and near Appaheni) in the main Bazar we beg to state that after acquiring the houses

houses, then as detailed in our statement (blocks II and II) some ~~other~~ stalls being the ~~relocated~~ at the cost of the municipality a ~~down~~ rent is out to the merchants and will secure the desired and anxiety of preventing the shopkeepers from converting their godowns into their habitation.

(16) It can be concluded from the report by stating that we proposed to demolish 889 houses the estimated cost of which comes to about Rs. 7000/-

When the Board resolve to do so our further work will be to find out places for ~~the~~ people as are deprived of their homes and also for such of those as are desirous of building in the Extension. It is not out of place to note here

that

Plans are the rules in the present
Sargudi Extension would not
be sufficient for the applicants
to build houses in the extension
the only place behind the old
Sargudi which is well suited
for building houses may
be acquired in due course.

We have the honor to be

Yours most obedient servant;
